

Features of Job Cost Advantage

1. Add Kits - simplifies quoting by using Stock items, then when the quote is won assemblies and sub-assemblies (kits) are added for you
2. Consolidate Job Purchase Orders - same item in repeated in a quote is consolidated in a purchase order (improved ordering)
3. Select and add multiple common phrases anywhere in a Job (great for quoting)
4. Delete Quote Lines
5. Fix Line Numbers
6. Resource Allocation - search for job costing resources with specific skills, qualifications, training, and inductions and assign to job.
7. Transfer cost/time lines to another job - move multiple lines from one job to another (saves time) -
8. Change Kit Quantities - standard system does not allow this
9. Delivery docket allows for creation of delivery docket for the job
10. Duplicate Job creates duplicate of current job allowing choice of items to copy.
