

## Momentum Auditor

Track changes to your data

This tool is designed to allow tracking changes to your data for many of the tables in your EXO system. You can then review, filter, and export the audit trail information as desired. The Auditor tool provides a full audit-trail not currently available in Exo.

### Benefits of Auditor

- Audits any required table and field
- Easy interface to query 'who' changed 'what'

### Recommended Uses

1. EXO Business with detailed audit requirements
2. EXO Businesses with multiple users

### Features of Auditor

1. Records field old and changed value
2. Records date changed and username
3. User interface to query and review
