Maximise efficiency and minimise complexities

MYOB Advanced Manufacturing is a cloud Enterprise Resource Planning (ERP) system that connects every part of your business end-to-end to support business growth. Integrate production planning and the shop floor with financial management to CRM to inventory management and sales orders to provide real-time coordination across your entire business. Combined with MYOB Advanced Payroll you can have centralized payroll and workforce management with ERP on a single cloud platform.

MYOB Advanced Manufacturing is built, developed and supported in Australia and New Zealand, with over 1000 mid-market businesses using MYOB Advanced Manufacturing across a range of industries. MYOB Advanced Manufacturing supports discrete and process manufacturing industries such as machinery and equipment, fabricated metal products, food products, transport products and furniture products. Manufacturing businesses that have either outgrown their accounting software due to ongoing growth or who would like to move from desktop ERP, all look to MYOB Advanced Manufacturing as their next step.

With MYOB Advanced Manufacturing, you can manage your manufacturing operations with ease anywhere, anytime on any device. For manufacturing businesses who experience supply chain and operational complexities, lack of visibility on costs and processes and experience continuous changes to demand – MYOB Advanced Manufacturing is the cloud ERP platform that minimises complexities, provides real-time insights across your entire business and provides tools so you can adapt quickly to changes in demand.

“One of our main problems was the management of our inventory. It was being managed through spreadsheets and that was not sustainable going forward. MYOB Advanced bought all of that together... to give us correct and accurate data that we could rely on.”

8 key benefits of MYOB Advanced Manufacturing

1 Streamline your manufacturing operations

Simplify operations with real-time coordination of all business activities from one central location.

4 Automate processes

Automate manual processes and achieve greater productivity, reducing errors, duplication of work and delays.

2 Reduce and track costs

Estimate costs and track and assign value will enable you to reduce and control costs at every step of the process.

5 Optimise inventory management

Efficiently manage your distribution process with system-wide inventory control and effective inventory management.

3 Respond effectively to market changes

Quickly respond to competitive market changes, complexities around the supply chain and customer demands with real-time and accurate information.

6 Enhance collaboration

Collaborate effectively with all teams across the business by having access to the same real-time updates.

7 Meets your business needs

Easily connect other apps to MYOB Advanced Manufacturing from our ecosystem partners to customise the cloud ERP platform to meet your unique business needs.

8 Supports business growth

MYOB Advanced Manufacturing is designed to scale as your business grows. As you acquire more customers, more goods and more locations, MYOB Advanced Manufacturing supports your business growth.

It elevates us in our service, expertise and professionalism. That information is unbelievable to have at your fingertips. Before, we'd have to flick through a big folder!"

MYOB Advanced Manufacturing key features

Bill of materials & routing

Connect materials, work instructions and overhead costs to an operation to accommodate time-phased release of materials.

Production management

Use manufacturing operations management software to capture total manufacturing costs, including material, labour, machine, tool, overhead, and outside processes.

Material requirements planning (MRP)

View all supply and demand. Create production and purchase orders directly from the planning screen.

Product configurator

Create a new configured order by simply copying or modifying an existing configured order or quote.

Estimating

Prepare estimates for existing or custom items. Create a simple, quick summary estimate or a detailed estimate using a bill of material structure.

Advanced planning and scheduling

Meet customer demands by setting accurate and reliable delivery dates based on availability of resources.

Manufacturing data collection

Print barcodes and utilise scanners to capture data from the shop floor including labour and material transactions and inventory movement.

Engineering change control

Manage version control and updates to bills of material (BOM) and routings while controlling effectivity dates that impact material planning, costing, and scheduling.

Inventory management

Gain real-time access to available inventory, inventory in transit, reorder quantities, and inventory costs.

Order management

Manage sales activities, streamline procurement processes, and automate order fulfillment for internal or external clients.

Purchase order management

Centrally manage your purchasing processes and automate the entire procurement process from vendor quotes to paying invoices.

Warehouse management

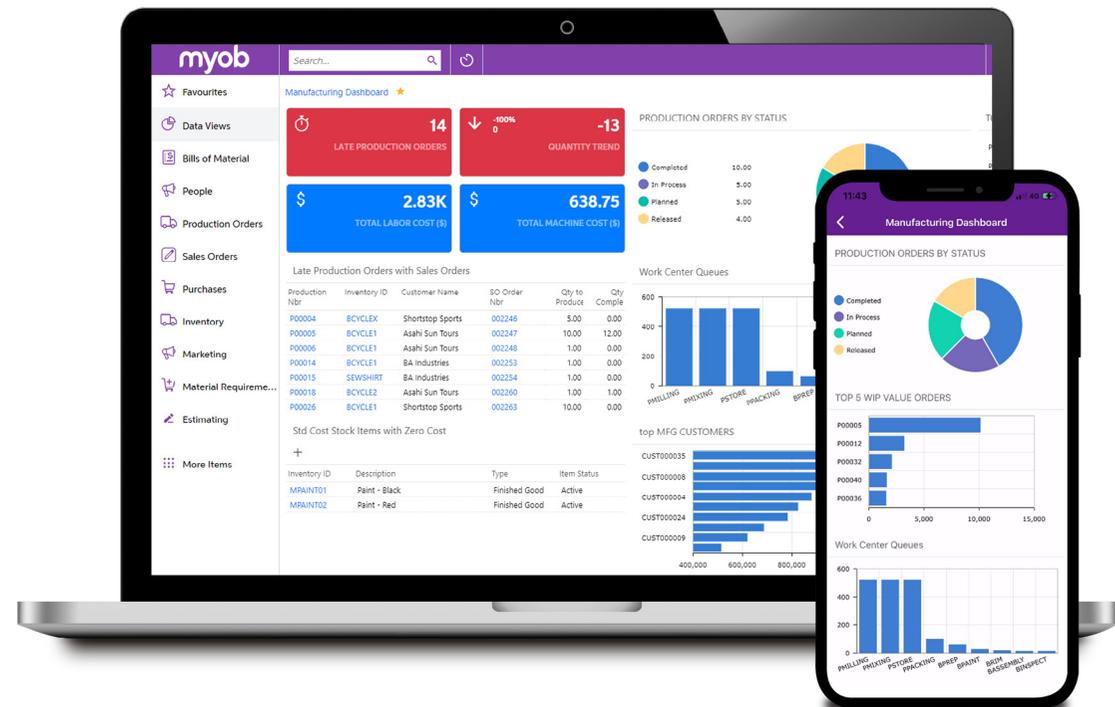

Streamline distribution processes with advanced warehouse operations in receiving, inventory management and order fulfillment.

Service management

Maximise dispatching by scheduling the right people at the right time and obtain real-time data for work taking place in the field.

Mobile app

You can access MYOB Advanced using any device wherever you are. Teams can capture and enter data wherever they are – from the warehouse to the customer to the office.

MYOB Advanced Manufacturing

Manufacturing businesses are always looking for ways to improve efficiency and boost productivity. Faster production speed and shorter delivery times, higher quality products without a corresponding rise in price and fewer errors.

MYOB Advanced Manufacturing delivers end-to-end business management software designed to meet the needs of Australian and New Zealand manufacturers. Everything you need to effectively manage costs, track inventory, and run operations are accessible through a single platform, giving you real-time visibility and full control of your production process.

Whether your business requires a system that supports ongoing business growth, managing multiple systems have seen an increase in business challenges or you've seen the benefits of using a cloud platform over on-premise, MYOB Advanced Manufacturing meets the needs of your business.

“MYOB Advanced has increased our production efficiency.”
