Get more with Wiise

How our customers get more out of the box
when they switch to Wiise.

Get more with Wiise

We've taken the base Business Central platform and built great features on top of it to help Australian small and medium-sized businesses get more, for less.

We work with our customers to build new features and additional capabilities in Wiise that Business Central might not have.

Get a localised ERP for less

Don't pay extra to customise Wiise to suit Australian business requirements. Get an Australian ready Chart of Accounts, bank feeds, EFT and Single Touch Payroll right out of the box. You'd usually pay extra with Business Central.

Pre-built integrations

We've built a number of integrations to help save you custom builds. From Shopify and Square POS to Chargebee, you can easily integrate your current tools with Wiise and have everything in one place.

Backed by big business

We continue to develop Wiise by adding new features and integrations. We work with KPMG Australia and Microsoft to ensure that your scalable business software is up for the job today and in the future.

Snapshot of **Wiise**

Wiise is custom-made for the Australian market giving you pre-built features and functions to get up and running sooner, saving you from costly custom builds.

120,000+ extra lines of code
On top of the Microsoft Dynamics Business Central platform

Over 16 new features to Wiise
Including bank feeds, landed cost, BPAY, Direct Debit and more

100+ additional UI enhancements
We've added 100+ ways to make your user experience better in Wiise

10+ custom-made Wiise reports
Improved balance sheets, income statements and budget reports

7 industry-specific Chart of Accounts
Industry specific CoA, designed by KPMG Australia

Trusted and secure platform

Wiise is fully certified by BSI against international security standards ISO27001 Information Security Management and ISO27017 Cloud Security. We apply best practice security standards and are regularly audited to make sure we're protecting your data.

Ongoing testing

Our product team does extensive regression, smoke and end-to-end testing on Wiise and on all our developments to make sure they work for the Aussie market. No extra cost. It's all part of the package.

Housed in Microsoft Azure Australia

Wiise is housed in Microsoft Azure data centres in Sydney and Melbourne. These meet the international code of practice for cloud privacy, ISO/IEC 27018, and allow for geo redundancies and federally-compliant database-level disaster recovery.

Direct connection

While other Business Central partners work through the Microsoft Support procedure, Wiise has a strong partnership with Microsoft. We meet weekly with their BC development and maintenance team. So we can provide better partner and customer feedback, fix issues faster and work together with Microsoft on product enhancements.

What's **under the hood?**

We've built Wiise on top of Business Central to provide a hyper-localised platform that meets the needs of Australian businesses.

Extensions: Customer modification

wiise — Our features: Wiise development
