Advance your bigger business

MYOB Advanced is transforming the way larger Australian and New Zealand businesses work. It includes the Advanced Business and the Advanced People suite. MYOB Advanced Business is an online business Enterprise Resource Management system (ERP) and MYOB Advanced People is an online payroll system.

The Advanced Business and People suites deliver an end-to-end business management system that provides ERP and payroll functionality on a single platform. The benefits of this unified system are realised when information flows between functions, reducing duplication of effort, manual data entry and real-time business insights.

MYOB Advanced will eliminate hardware costs, giving you a fully customisable platform for a convenient monthly price. And your online data is securely stored locally, giving you the flexibility and freedom to work the way you want.

MYOB Advanced platform benefits

1 Easy

Convenient monthly pricing plans

Now you can transition to a sophisticated, functionally rich system without a large upfront investment. MYOB Advanced Business and Advanced People are available for a convenient monthly subscription. Straight forward pricing options allow you to better plan and manage your business expenses throughout the year. You can also change your subscription plan to best suit your changing business needs.

No hardware to maintain

MYOB Advanced delivers extensive functionality without the need for complex and expensive servers or your own data centre. Users access MYOB Advanced from any browser based device making it an ideal solution for companies with multiple locations and/or a mobile workforce.

Helping larger Australian and New Zealand businesses succeed

As the leading local provider of business management software in Australia and New Zealand, MYOB has a rich history of innovation and leadership in business management, payroll and Human Resource (HRM) software. That's why we've partnered with Amazon Web Services (AWS), a best-in-class, high availability data centre. Located in the Sydney region, AWS uses the latest technology to ensure working with MYOB Advanced Business and Advanced People is a hassle-free, seamless experience.

Professional support and expert knowledge

For over 25 years, more than a million businesses have trusted MYOB for their accounting and business needs. MYOB Advanced software is implemented and supported by our MYOB Partner Network across Australia and New Zealand. MYOB Accredited Partners provide expert advice and work directly with you to match the right system to your business needs, both now and into the future.

MYOB Advanced platform benefits

2 Better value

Convenient monthly pricing plans

Now you can transition to a sophisticated, functionally rich system without a large upfront investment. MYOB Advanced Business and Advanced People are available for a convenient monthly subscription. Straight forward pricing options allow you to better plan and manage your business expenses throughout the year. You can also change your subscription plan to best suit your changing business needs.

No hardware to maintain

MYOB Advanced delivers extensive functionality without the need for complex and expensive servers or your own data centre. Users access MYOB Advanced from any browser based device making it an ideal solution for companies with multiple locations and/or a mobile workforce.

Grows with your business

As your business grows, so can your MYOB Advanced system. It's designed to be fully customisable, meeting your current business requirements while being flexible enough to meet future demands. Developed with scalability in mind, it will continue to support the growth and evolution of your business. That means you don't need to waste money investing in new software.

3 On the go

Work anywhere, anytime

MYOB Advanced gives you the freedom to work securely online – anywhere, anytime. You have the flexibility to work from any device, all you need is a web browser and internet connection to access real time information, wherever and whenever you want. It's easy to set up and the user interface can be customised to meet the needs of the individual user.

Better still, the MYOB Advanced OnTheGo app can provide quick and easy access to a number of employee, CRM, distribution and service processes enabling staff to query and update transactions anywhere, anytime.

MYOB Advanced Business

Experience a fully featured business management system that covers your entire business operations, from administration to warehouse and everything in between. Every area of your business can benefit from MYOB Advanced Business. Whether it's reduced administration time, greater stock control or real time management reports - the gains are considerable and extensive.

Powerful features

- Organisational workflow engine lets you define actions and approval requests.
- Send email notifications to users, customers and suppliers when certain conditions are satisfied, like a shipped order or an assigned lead.
- Customise screen views to match your business process – add or remove fields, make fields mandatory or change their position.
- Use interactive dashboards and a full content-managed Wiki to quickly provide users with relevant business information.

Effective inventory management

- Maintain detailed information on your inventory including supplier codes, barcodes, cost and sell pricing history.
- Track inventory levels and costs across multiple warehouses and locations.

Streamlined sales and purchasing

- End-to-end sales order and back order management, including freight calculations and automatic customer notifications.
- End-to-end purchase order and landed cost tracking.
- Advanced purchasing features including blanket orders, purchase requisitions and bid management, and forecast based purchasing, blanket orders and purchase requisitions.
- Interactive customer portal that allows customers to view and download invoices and statements, check inventory, add to cart and then check out sales orders.

General ledger and accounting

- Enterprise level financial and budgeting features.
- Full support and handling for multi-currency.
- Multi-company support with inter-company consolidation.
- Manage and understand your cash position with cash flow forecasting and reporting.
- A full suite of financial analysis reports, including GST and BAS reporting.
- Fixed asset management.
- Debt collection, payment instalments and a range of other tools to simplify business management.

Integrated CRM and customer service

- Maintain a database of prospects, customers and contacts.
- Manage leads and easily convert to sales orders.
- Create marketing lists and email campaigns to connect with prospects and customers.
- Collect leads from your website.
- Track service cases and tasks logged by your customers.
- Publish a knowledge base via the customer portal.

Automated field service operations

- Track and manage every detail of your field operations.
- Maintain a real-time view of the technician's progress on the job.
- Track all assets owned by you or your customer and schedules preventative maintenance.
- Connect your staff with mobile services where they can access routes, future appointments, customer information and last-minute updates.
- Track warranty classes according to models of equipment, improving customer satisfaction.

Comprehensive project accounting

- Track and report on projects, tasks and budgets.
- Automate project billing with our pre-defined allocation and billing rules engine.
- Allocate transactions and costs from other Advanced modules directly to projects, such as invoices from suppliers, invoices to customers, journals from the GL and receipts from purchasing.
- Employees can enter time and expenses from any mobile device via the MYOB Advanced OnTheGo app.

- Product configurator tool to enhance quality and accuracy in manufacturing complex products
- Integrates with Finance and Inventory Management

Momentum MYOB Advanced success story

Overview

ATP Science is a company that believes in "Nature knows best". They specialise in developing supplements derived from all natural ingredients to help improve every aspect of health and well-being. For years ATP Science has pioneered the utilisation of natural ingredients paired with scientific research to produce products that not only enhance physical performance but also mental and hormonal performance too.

Toni Doidge co-founded ATP Science - one of Australia's leading science-backed health and supplement brands with her husband Jeff and friend, lead scientist and naturopath Matt Legge. The 3 founders developed philosophy of the company and it is simple - Be amazing and create exceptional value by achieving more than what the customer thinks is possible.

ATP Science has achieved phenomenal business growth in recent years - averaging 200-300% per annum. This Brisbane-based manufacturer and distributor of nutrition and body-building products is moving seriously into the export market, a feat it says to could never have achieved without its MYOB Advanced cloud-based ERP system.

Problem

Systems not communicating

When ATP decided to set up its own manufacturing plant, with a plan to go international, the limitations of its legacy business systems became apparent. Using cloud-based DEAR software for inventory management and purchase order, and Xero for financial management was a nightmare.

When they started their own manufacturing things got worse - legacy systems couldn't put together a manufacturing run or create a product from a set of ingredients and follow it all the way through to inventory with costings, etc. ATP needed something that could handle production as well as the inventory, and in various warehouses.

The lack of communication between the two systems was also creating cash flow problems. ATP didn't trust its financial data and creditors were complaining about money it didn't even know was owed. Compiling reports was a regular ordeal involving spreadsheets and pivot tables, and given the problems they were facing keeping track of its on-the-road sales team's figures, they knew a better system was needed if it was to become a successful exporter.

"When we started manufacturing, our nightmare increased tenfold"

Solution

Integration delivered via the cloud

To fulfil its exporting ambitions ATP needed a single solution that solved all their problems, and it had to be a cloud-based system for convenience, so everything on the IT side could be managed internally.

"The integrated inventory and financial control were the biggest things for us" says Toni Doidge ATP Director.

After consulting AusIndustry, a division of the Department of Industry, Innovation and Science, ATP were introduced to Momentum Software Solutions and MYOB Advanced. The problems and needs were discussed and subsequently a solution was created, with the key attraction for ATP being the integrated Manufacturing module within MYOB Advanced, which streamlines the process of filling batch orders with pre-configured lists of materials.

"We wanted a system that wasn't just for us now, we wanted a system that is going to work if we continue this growth rate for the next 10 years. I believe MYOB Advanced will do this for us"

Outcome

A huge boost for business

The impact MYOB Advanced has had on the business was apparent from day one and ATP has only just started realising its full capabilities. These days, Accounts, Warehousing and Production all integrate with each other, and paperwork has viturally been eliminated.

Another thing of the past is the daily stock-take of products on the shelves. Advanced delivers live data that is automatically updated as the finished goods enter the various warehouses.

Reports are now much more easily accessible, with MYOB Advanced offer an unprecedented level of information, while cash flow analysis is also vastly improved. In terms of expanding the business, forecasting can be done for the year ahead which is especially important for ATP who have a strong focus on growth.

"We have a system that can manage our manufacturing and distribution processes in one package. But more importantly we know that we can trust our data - that's a massive relief"
