

Take your business to the next level

## MYOB Advanced – Using the Restriction Groups Feature **Overview**

In MYOB Advanced you may find that when using the Restriction Groups feature, it may not work as expected when you access the Inventory Item Class.

The Restriction Groups feature will be available for new items when they are created. You can't apply for this feature for already created items.

## **Examples of Restriction Groups**

If you add a user and an item to a Restriction Group, you'll still be able to find the item in the Stock Item screen which falls under the class.

In this example, user Charcy is restricted to access the tiem – Banana under the class – Fruit.

Sroup Name:			
Group Type: Description:	Active B Inverse	Entity Type: Specific Type: Specific Module:	User - User $ ho$
Č  ↔  X B Included En	tity	T	
Cł	aarcy, Charcy 2		
Vhen searchir	ng for the item in the Stocl	k items screen, ye	ou'll be able to find it.
