

MYOB Advanced Business

The MYOB Advanced Autumn Release 2023 has touched down. Boost your experience with brand new features. Get greater visibility with enhancements that streamline your workflows. And experience connectivity that'll blow your mind. Explore updates to MYOB Advanced Business, and unleash your business's full potential.

Side-panels

Perform common tasks at light speed with new side-panels.

- A new user interface for completing common tasks including view, modify, print or email.
- Click on an individual record and take action directly within the side-panel.
- Eliminate the need to click into an individual record, then back to the main screen, saving time and effort.

Inventory Turnover Ratio calculation

Understand how effectively your business buys and sells inventory with easily accessible Inventory Turnover data.

- Quickly calculate inventory efficiency with the click of a button.
- View in dollars, times sold and replaced, and number of days a Stock Item takes to convert into revenue.
- Power your decision-making with granular insights. Drill down to company or warehouse level, or by specific Item Class or Inventory ID.

General Ledger Transaction approvals

Take control of your General Ledger Transaction approvals with enhanced approval workflows.

- Create automated multi-approver workflows to improve control while reducing bottlenecks in your business.
- Customise your workflows and approval requirements to suit your business's specific needs.
- Gain improved visibility of approvals for auditability purposes.

Stock and Non-Stock Item conversion

For dynamic, fast-paced goods-based businesses, it's now even easier to convert your Stock Items.

- A simpler way to convert your Stock Items into Non-Stock Items and vice versa.
- Easily convert Stock Items individually or en masse, saving you time and effort.
- Track every operation with the Conversion Log, an automated record of the date of conversion, the user who converted the Item, and the new status of the Item.

Additional features and enhancements

- Export Sales Orders to your Shopify store, and improve item availability for both Shopify and BigCommerce, allowing you to provide an improved omni-channel retail experience.
- New Sales Order Notes and Attachments capability allows you to pin information to your Shipping or Invoice records.
- Dunning letters Customer Classes, enabling you to execute personalised communication treatments.
- New pre-defined, role-based dashboards for Sales, Purchasing, Warehouse, Receiving and Shipping-related roles.
- Multi-currency extension, including dunning letters management and contract management.
- Change packing box dimensions on the fly while preparing a shipment for a Sales Order
- Change a business account in an existing opportunity or sales quote. Create multiple sales quotes for different business accounts in the same opportunity.

For more information about this year's Autumn Release, don't hesitate to get in touch with your Customer Success Manager or dedicated Business Partner.
