

# MYOB Advanced Manufacturing

The MYOB Advanced Autumn Release 2023 has touched down. Boost your experience with brand new features. Get greater visibility with enhancements that streamline your workflows. And experience connectivity that'll blow your mind. Explore updates to MYOB Advanced Business, and unleash your business's full potential.

## Engineering Workbench

---

Effortlessly manage multi-level Bill of Material (BOM) structures with new usability enhancements.

- New tree structure visualization makes managing your multi-level BOM structure simple.
- Easy-to-use drag and drop functionality makes it easier to change your BOM structures.
- New keyword search functionality allows you to quickly find relevant nodes in your BOM tree structure.

## Blanket Orders and Transfer Orders

---

The end-to-end management of Blanket Orders and Transfer Orders is improved with new automation enhancements.

- Blanket Sales Orders are now included in Material Requirements Planning (MRP) calculations.
- Creation of Transfer Orders are now automated, saving your team time and eliminating manual tasks.
- MRP creates demand records for transfer quantities and factors in transit times between warehouses.

## Quality Management

---

Enhance your visibility of project progress and productivity with improved task and unit-level reporting capability.

- Create automated multi-approver workflows to improve control while reducing bottlenecks in your business.
- Helps project managers to track project productivity and define the potential impact of these activities on the project schedule and cost budget.
- Gain improved visibility of project task execution.

## Batch Expiry dates

---

Eliminate manual processes when creating Batch Expiry dates with automation enhancements.

- Easily create expiry dates for a Lot Tracked Item. Simply define the Unit of Measure and Multiplier values and MYOB Advanced Manufacturing will automatically create an expiry date for the batch's final operation.
- Create exceptions to the standard expiry date for specific batches produced.
- Reduce manual tasks and increase accuracy.

## Additional features and enhancements

---

- Multi-base currency has been extended to MYOB Advanced Manufacturing, building on enhancements delivered in the MYOB Advanced Spring Release 2022.
- A new Multiple Production Clock Entry screen is now available that allows for a resource to clock in and clock out of one or more production orders at the same time. This new feature supports scenarios where all production orders are clocked in and out simultaneously, as well as catering for staggered start and end times for each production order.
- Manufacturing side-panels allow you to view, modify, print or email from an individual record. Click on a record and take action directly within the side-panel, reducing time and effort spent on repetitive tasks.
- Production Managers can now define by Production Order Type whether to allow, warn or disallow the reporting of production quantities greater than the production order quantity to produce.
