MYOB Advanced Payroll

The MYOB Advanced Autumn Release 2023 has touched down. Boost your experience with brand new features. Get greater visibility with enhancements that streamline your workflows. And experience connectivity that'll blow your mind. Explore updates to MYOB Advanced Payroll, and unleash your business's full potential.

Casual and Waged employees

Streamline the way you manage pay runs for casual and waged employees with time-saving enhancements.

- Simplified bulk timesheet import process for permanent team members.

- Reduce pay run processing time for casual employees with new Employee Details settings. You can now add casual employees from timesheets for that pay period, eliminating the need to create a pay run with all employees and then removing casuals with no time worked.

- Eliminate the need to reverse an entire timesheet import to fix individual errors. Simply reverse the import on an individual employee level and reimport them once resolved.

MYOB Advanced Employee Onboarding

- Automate manual processes and tasks, eliminate unnecessary paperwork, and simplify compliance with new Australian superannuation obligations.

- Syncs seamlessly and automatically with MYOB Advanced Payroll, eliminating manual data entry and re-keying.

- Deliver a perfect first impression, with a customisable digital experience that delights your new starter from day one.

- For Australian businesses, capture your employee's superannuation fund preference upfront and online, eliminating manual compliance processes.

- Enjoy peace of mind that MYOB Advanced will grow with you. Need more than just onboarding? Take the next step with MYOB Advanced Workforce Management and add rostering, time and attendance, employee self-service and reporting capability.

- [Learn more](#) about MYOB Advanced Employee Onboarding.

Additional features and enhancements

- Upskill your team with new MYOB Academy training courses, covering Payday and MYOB Advanced Employee Onboarding.

- Enhancements to our payroll expense allocation documentation makes the feature easier to adopt and use.

For more information about this year's Autumn Release, don't hesitate to get in touch with your Customer Success Manager or dedicated Business Partner.
