

Transform employee management with Swag and Clock Me In

Revolutionise processes and save time chasing employee details by empowering employees to enter their own data. Add value to client experience and give yourself more time in the day to invest in growing your accounting, bookkeeping, or outsourced payroll firm.

swag

What is Swag?

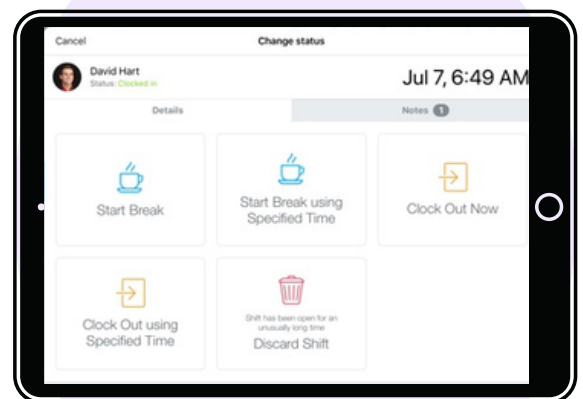

Created by the Employment Hero team, this world-first superapp helps employees manage work, grow their savings, and claim exclusive benefits. No computer is required, and no distractions for you or your clients. Employees can access the employee portal features through their smartphone, catering to those who are constantly on the run or don't have access to a desktop computer.

CLOCKMEIN

What is Clock Me In?

Gone are the days of chasing after employee timesheets! Clock Me In is Employment Hero's time and attendance iPad app that standardises timesheets and attendance tracking by empowering employees to take responsibility for their clocking activity in real-time. That's right; the to-do list for you and your clients just got shorter.

EMPLOYEE DETAILS

Let employees update their personal details, or emergency contacts via the Swag app – with access at any time, requiring no involvement from managers or HR. Employees can also view bank accounts to ensure the information has been recorded correctly.

ATTENDANCE

Staff can clock in and out from directly within the app and Clock Me In, sending this information straight to managers to confirm attendance. Perfect for staff working across multiple locations, or working remotely.

LEAVE MANAGEMENT

Employees can apply for leave directly within the app – no emails or paper forms required. Employees can submit leave requests that automatically notify managers, who can view, edit, decline, approve or cancel requests as soon as they come in.

PAY SLIPS & DOCUMENTS

Notify employees via push notification or email as soon as pay slips are published. Employees can also view and acknowledge work-related documents from their phone (such as internal documents during the onboarding process), eliminating the need for paper and manual collation of forms.

SHIFTS

Employees can easily view, accept or decline shifts from directly within the app. Rosters can be viewed alongside events in their phone's calendar, to ensure availability in real-time. Managers can view unassigned or bidding shifts, as well as employee unavailability and approved leave. Shift management has never been more transparent!

UNAVAILABILITY

No more rostering inefficiencies for your clients! Employees can set their unavailability, automatically notifying managers. Managers can also edit or delete unavailability on behalf of staff, automatically notifying them of any changes.

TIMESHEETS

Timesheets can be created directly in Swag by employees, and are automatically sent to managers to view, edit, reject, approve or delete within the app. Timesheet data is streamlined, as it's calculated and fed directly into the pay run – meaning no data double handling.

RECORDKEEPING AND COMPLIANCE

Your clients can automatically retain records of all staff work hours and breaks, securely in the cloud. Ensure timesheet data is tracked and calculated correctly for compliant leave and wage rates.

EXPENSE CLAIMS

Reduce the manual effort of emailing, texting or sending expense claims to managers. Employees can take photos of receipts on their phone and lodge expenses directly within the Swag app. Managers can then view, edit, approve or reject claims on the spot to save time.

“Swag is a great little app that makes it easy for the end of day reporting. Managers and staff can have a look and verify what's been happening with ease.”

– Sue Brunton, CEO of Brunton NZ

Momentum Payroll powered by Employment Hero

Momentum Payroll powered by Employment Hero is a cloud-based payroll and workforce management platform, built by payroll professionals, for payroll professionals. In a single platform, Employment Hero Payroll automates the flow of data from employees across rosters, timesheets, leave management, and reporting to streamline operations and reduce costs.
